Style board: three design directions (print size, point estimates only, no intervals)

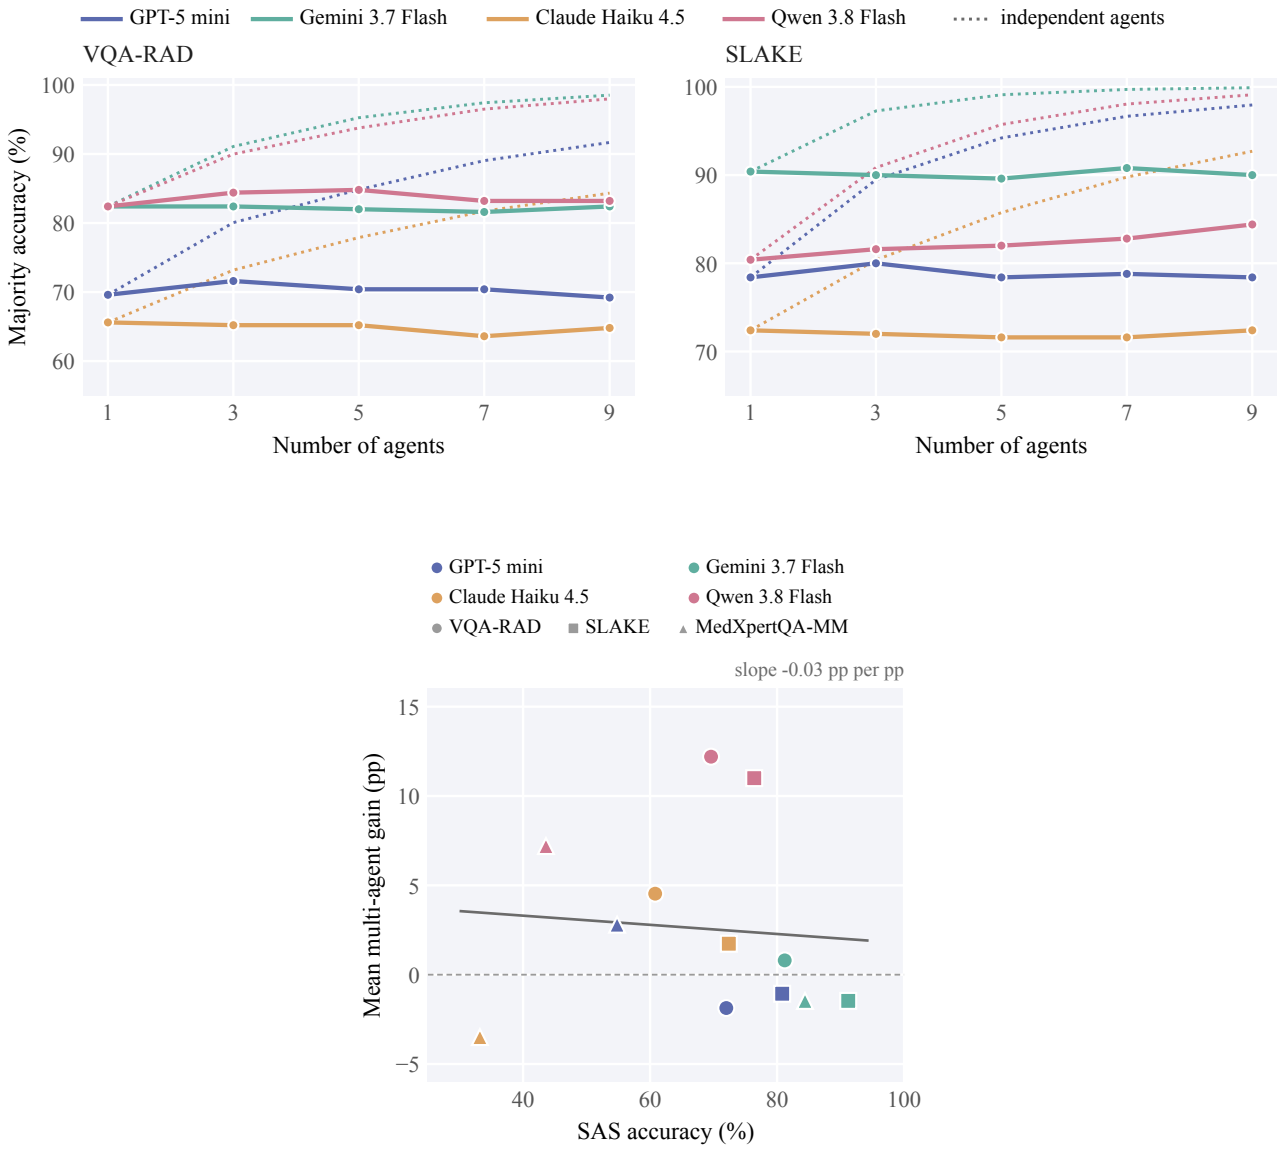

The same two figures in each direction: agent scaling (full width) and capability against multi-agent gain (column width). Data figures stay in Times New Roman.

A Brand minimal: family brand hues, model logos as labels and markers, light grid

B Pastel soft: NMI pastel family, tinted panels, white grid, no spines

C Editorial: systems in grey, one accent for the key comparison, statements at the line ends
